Large space notices and notices will be charged for at special rates.
All communications must be accompanied by the names of the authors, and rejected communications cannot be returned.

New Method of Producing Light.
[From the New York Times.]

An interesting exhibition of the uses of oxygen gas, produced at a price suitable for industrial applications, according to the process of Messrs. Tessie du Motay & Marechal, of Metz, France, took place yesterday afternoon at the office of Messrs. Stern, Stevens, & French, No. 22 Nassau street. The gentleman last named are about to introduce in this country the improved method of producing cheap light in accordance with this process, which was introduced so successfully at the Paris Exposition. In a darkened room the effects of the illuminator were made apparent, and were explained by Prof. R. Ogden Doremus, the eminent chemist. The substance employed in this process are the alkaline manganates. These salts act as a sponge, alternately absorbing the oxygen of the air, and again releasing this important gas. These operations may be repeated *ad infinitum* with the same manganates. This extraordinary property is based on the following reactions:—1. The manganates are decomposed by the action of about 850 degrees Fahrenheit, by the action of a jet of ordinary steam, which liberates the oxygen and leaves a residuum composed of the sesquioxide of manganese and the alkali base, contained in the combination. 2. The manganates are regenerated by submitting the above mentioned solid residue to the action of a current of air at the same temperature as used in the decomposition. These operations are conducted in a series of retorts placed in a furnace, where the manganates after being raised to the temperature of 850 degrees are alternately submitted to the action of a jet of steam and a current of air, which restores to the mass the oxygen it had lost. The oxygen disengaged by the steam issues mixed with it from the retorts, the steam is liquefied by passing into a condenser, and the pure oxygen is collected in a gasometer. When applied for the production of light, oxygen in combination with common coal gas permits a reduction in the consumption of the latter (at the same time giving an equal quantity of light) in the proportion of 1 to 1. Oxygen gas in this produced at a price suitable for a great variety of metallurgical, chemical or other processes where a high temperature is required.

Experiments in Paris with regard to this light were conducted by Commander Caron, of the *Magic d'Artillerie*, and M. Le Brand, of the Emperor's household, under the direction of the Emperor. They were entirely successful. The Hotel de Ville and the square in front of it were lighted with it for seven weeks, and the Emperor has ordered that the improved light be used in the Rue de Rivoli, the Court of the Tuilleries and the Hotel de Ville permanently. Besides its great brilliancy, it is inodorous, innocuous, portable and inexpensive. It is to all intents and purposes the calcium light brought within the limits of everybody's means for ordinary purposes. Steps will be at once taken to light Printing House square, the Fifth Avenue Hotel, and other public places and buildings, that the people may have an opportunity of judging of its superiority.

A TEST OF MORALITY.—There is a general decay of public morality in the little Mississippi town known by the sounding title of Yazoo City. A local paper deprecates the evil habits into which the men of the place have fallen. "Are there twenty men in Yazoo City," it inquires, "who do not average from three to nine drinks daily?" Nor is this the worst; the "drinks" are taken on empty stomachs, "when the liquor, having nothing with which to assimilate, acts directly upon the mucous membrane." Yet the editor of this Yazoo sheet does not mean to say that Yazoo is a dissipated place; he simply announces the fact that it is the fashion to be drunken, and he adds with charming candor that this tendency of the population is really deplorable, "on account of the peculiar character of our common diseases," and the consequences are therefore more serious than they would otherwise be. But the conclusion is the best:—"No gentleman need feel touched at our remarks, and say we are after motives in other people's eyes; for we very candidly acknowledge our partiality to the stuff, and if any one thinks we will not take it, just let him bring along a bottle and try us. But does that alter facts? We are no doctor, and may be wrong; but the subject is worth consideration."

PLANT OAK TREES.—The process of deforesting our lands upon the Atlantic border has gone on for centuries, and in the very populous States has necessitated replanting. It is a fact not sufficiently known, that oaks may be rapidly grown and will develop within an ordinary lifetime, fine groves of those noble trees which give so much dignity to an old homestead. Major Ben. Perley Poore has upon his estate in Massachusetts a splendid oak forest, or woods of thirty acres, every acre for which was planted by himself about thirty years ago. The trunks of the trees are now from a foot to a foot and a half in diameter.—*Wash. Chron.*

VALUABLE WHARF AND OTHER PROPERTY FOR SALE, AT AND NEAR ALEXANDRIA, VA.

LAND AGENTS.
THOMAS A. BALL, GRAYSON TYLER,
LAND AGENCY.
OFFICES—Gainesville Depot, Manassas Gap Railroad, and Buckland, Prince William county, Va.
The subscribers having associated themselves for the purpose of buying and selling lands in Fauquier, Prince William and adjoining counties, are prepared to offer to purchasers a number of farms, containing from 200 to 1000 acres, at prices ranging from \$5 to \$40 per acre. Parties desiring to locate in this State, will do well to examine the lands we offer before purchasing elsewhere.
Will attend the depot at Gainesville, and at Buckland, and be prepared to take care of and show parties the property we offer.
This immediate vicinity offers great inducements in the way of rail and turnpike roads to the markets of Alexandria, Georgetown and Washington, distant 35 to 40 miles, and from 5 to 8 miles from Warrenton, on the Orange and Alexandria R. R., the country seat of Fauquier. No section of the State possesses greater advantages for grazing, fruit culture and farming, its nearness to market enabling producers to place in the above market daily the surplus products of fruits, vegetables, &c.
Flour and grist mills are numerous. At Buckland, 3 miles from Gainesville, a large woolen factory is in successful operation, affording a home market for wool and other products. The water and health of this section is unsurpassed.
We will be glad to furnish information to all parties desiring it, with full descriptions of the lands. Terms of sale will be liberal. Address,
BALL & TYLER,
P. O. Gainesville Depot,
Prince William county, Va.

THE PENN COPIING BOOK.
Something entirely new and reliable as I have already had it practically tested. By the use of this book and the ink which accompanies it, you save the expense and trouble of a copying press and the use of water to moisten your letter. By the use of this book you can take a copy some hours after it has been written.
Also, the French Instantaneous Copying Book, upon the same principle as the above.
Every business man, who copies his letters, should have one, particularly those who are traveling and wish to preserve copies of their correspondence.
Also, the Penn Combination Patent Marking Apparatus, for indelibly marking Linen, Muslin, &c., without preparation, put up in a neat case, containing the entire fixtures.
All the above receiving and for sale at manufacturers' prices. JOHN H. PARROTT,
Dealer in Paper, Stationery, Music, &c., Alex. Va. my 5—tjt

BALTIMORE LOCK HOSPITAL.
ESTABLISHED AS A REFUGE FROM QUACKERY.
THE ONLY PLACE WHERE A CURE CAN BE OBTAINED.

DR. JOHNSON has discovered the most Certain, Speedy, and only Effectual Remedy in the World for Weakness of the Back or Limbs, Strictures, Affection of the Kidneys or Bladder, Involuntary Discharges, Impotency, General Debility, Nervousness, Dyspepsia, Languor, Low Spirits, Confusion of Ideas, Palpitation of the Heart, Trembling, Dimness of Sight, or Giddiness, Diseases of the Head, Throat, No. 6, or Skin, Affections of the Liver, Lungs, Stomach, or Bowels—those Terrible Disorders arising from Solitary Habits of Youth—sacred and solitary practices more fatal to their victims than the most violent Syms to the Mariners of Ulysses, blighting their most brilliant hopes or anticipations, rendering marriage, &c., impossible.

YOUNG MEN.
Especially, who have become the victims of solitary vice, that dreadful and destructive habit which annually sweeps to an untimely grave thousands of our young men of the most excellent talents and brilliant intellect, who might otherwise have entranced listening Senators with the thunders of eloquence, or waked to ecstasy the living lyre, may call with full confidence.

MARRIAGE.
Married Persons, or Young Men contemplating marriage, being aware of Physical Weakness, Organic Debility, Deformities, speedily cured.
He who places himself under the care of Dr. J. may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

ORGANIC WEAKNESS.
Immediately cured and full vigor restored. This distressing affection, which renders life miserable and marriage impossible, is the penalty paid by the victims of improprity. Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, the most excellent and reliable remedy is at hand, to deny that the power of procreation is lost, sooner by those falling into improper habits than by the prudent? Besides being deprived of the pleasure of healthy offspring, the most serious and destructive symptoms of both body and mind arise. The system becomes deranged, the Physical and Mental Functions weakened, Loss of Procreative Power, Nervous Irritability, Dyspepsia, Palpitation of the Heart, Indigestion, Constitutional Debility, and Wasting of the Frame, Consumption, Decay and Death.

DR. JOHNSON,
Member of the Royal College of Surgeons, London, Graduate of one of the most eminent Colleges in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philadelphia, and elsewhere, has effected some of the most astonishing cures that were ever known, many troubled with ringing in the head and ears when asleep, gouts, such as the subject with frequent blushing, attended sometimes with derangement of mind, were cured immediately.

TAKE PARTICULAR NOTICE.
Dr. J. addresses all those who have injured themselves by improper indulgence and solitary habits, which ruin both body and mind, uniting them for either business, study, society or marriage.
These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c. The fearful effects on the mind are much to be dreaded. Loss of Memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion to Society, Self Distrust, Love of Solitude, Timidity, &c., are some of the evils produced.

Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous and emaciated, having a singular appearance about the eyes, Cough, and Symptoms of Consumption.

YOUNG MEN.
Who have injured themselves by a certain practice, indulged in, a habit frequently learned from evil companions, or at school, the effects of which are nightly felt, even when asleep, and, if not cured, renders marriage impossible, and destroys both mind and body, should apply immediately.
What a pity that the young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyments of life by the consequence of deviating from the path of nature, and indulging in a certain secret habit. Such persons must, before contemplating

MARRIAGE.
reflect that a sound mind and body are the necessary requisites to promote conjugal happiness. Indeed, without these the journey through life becomes a weary pilgrimage; the prospect hourly darkens to the view, the mind becomes shadowed with despair and filled with the melancholy reflections that the happiness of another generation is blighted with your own.

DISEASES OF IMPRUDENCE.
When the misguided and imprudent votary of pleasure finds that he has incurred the seeds of this painful disease, it too often happens that an ill-tempered sense of shame or dread of discovery deters him from applying to those who, from education and respectability, can alone befriend him, delaying till the consequences of this horrible disease become more and more apparent, such as ulcerated sore throat, diseased penis, a curdled pain in the head and limbs, dimness of sight, deafness, nodes on the sinews and a run, blotches on the head, face and extremities, progressing with frightful rapidity till at last the victim of this awful of the nose fall in, a horrible object of commiseration becomes, till death puts a period to his dreadful sufferings, by sending him to "that Undiscovered Country from whence no traveller returns."

It is a MELANCHOLY FACT that thousands fall victims to this terrible disease, owing to the unskillfulness of ignorant and unprincipled quacks, who, for the sake of a few dollars, ruin the constitution, and make the residue of life miserable.

DR. JOHNSON,
OFFICE, No. 7, SOUTH FREDERICK STREET,
BALTIMORE, MD.
